

Review and Consideration of Current Position Statements Without Changes

Summary of Request:

Annually, The Texas Board of Nursing (Board or BON) Position Statements are reviewed and determined if updates are needed related to changes in national practice trends. To make this determination, throughout the year, Board staff keep apprised of changes in practice nationally through evidence based practice developments, guidelines, and regulation movements. This report is comprised of those position statements in which Board staff have no recommended changes to content or context. As needed Board staff update broken hyperlinks and make editorial changes for consistency, such as updating names of documents as they change over the years.

Historical Perspective:

Though Board Position Statements do not have the force of law, they provide guidance for nurses on relevant practice and licensure issues. The annual review of Board Position Statements allows the opportunity to accurately parallel their content with advances in practice, the Nursing Practice Act, and Board Rules. The following current positions statements did not have any recommended changes to the context or content of the Position Statement.

Current Position Statements Without Changes

- 15.1 [Nurses Carrying Out Orders from Physician Assistants](#)
- 15.3 [LVNs Engaging in Intravenous Therapy, Venipuncture, or Peripherally Inserted Central Catheter \(PICC\) Lines](#)

Pros and Cons

Pros:

Adoption of the current Board Position Statements with no changes will allow for continued guidance for nurses and the public related to relevant practice and licensure issues.

Cons:

None noted.

Staff Recommendation:

Move to accept current Board Position Statements without any recommended changes, with allowance for non-substantive word and hyperlink editing for purposes of clarity as may be deemed necessary by Board staff.
