Evidence Shows SARS-Cov-2 is the Direct Result of Federal Funding of Gain-of-Function

- NIH grant AI23946-08 issued to Dr. Ralph Baric at UNC Chapel Hill officially classified as affiliated with NIAID by 2003.
- Baric begins working on synthetically altering **Coronaviridae** for the expressed purpose of general research, **pathogenic enhancement**, detection, manipulation, and potential therapeutic interventions targeting the same.
- By 21 May 2000* Baric reports they have successfully rescued infectious clone** of SARS-CoV Urbani strain cDNA using **reverse genetics**.
- On 19 April 2002 before the first SARS-CoV outbreak in Asia Christopher M Curtis, Boyd Young & Ralph Baric file a patent for a **recombinant (chimeric) DNA** means of producing
 - "an infectious, replication defective, coronavirus."
 - Funded by NIH grant GM63228.
- In short, the U.S. Dept. of Health & Human Services was funding research on **amplifying the infectious** character of Coronaviruses between 1999 and 2002 BEFORE SARS-CoV was ever detected in humans.
